SUBJECT: OTTAWA RESPONSE: DEMARCHE ON CODEX MEETING ON
INFANT FORMULA STANDARDS

REF: SECSTATE 202287

(SBU) 1. Econoff provided talking points to specified Health Canada contact Christina Zehaluk on November 4, 2005. Ms. Zehaluk said that the GOC would support a higher level for added nucleotides, and if 16mg/kcal was "the number on the table" she felt that the GOC could probably support that, based on current added levels in products for sale in Canada and the United States. Ms. Zehaluk did mention, however, that she does not feel that this is the most important topic under consideration at the upcoming meeting, and she is surprised at the level of attention it is getting.
